DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of species II (Figure 3) in the reply filed on 18 December 2006 is acknowledged. The traversal is on the ground(s) that species III would not require any additional search. This is not found persuasive because this species requires a recess for the light source, which is not included in species II.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 7 and 15 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 18 December 2006.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5, 8 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Kingston, US #3,968,584.

5. Kingston discloses an illuminated sign comprising housing 15 (Figures 1 and 2), front plate 12 mounted to the housing, at least one three-dimensional body 13, light source 7 and light guide 5 for coupling light from the source to the body. Light guide 5

Art Unit: 3611

comprises a plate-like structure made from light-transmitting material and extends parallel to the front plate and engages the three dimensional body.

6. All the surfaces of the light guide are coupled and engage to the three dimensional body.

7. The width of the end of light guide 5 is smaller than the width of the three dimensional body as shown in Figure 1.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kingston.

10. Kingston does not specifically teach the light guide as containing a fluorescent substance, however it would have been obvious to one having ordinary skill in the art to utilize such a substance since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

11. Claims 6, 14, 16, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kingston in view of Shelton, US #5,536,558.

12. Kingston (as discussed above) does not teach a beveled edge of the plate, however such edges are well known in the art as shown by Shelton. Shelton teaches

Art Unit: 3611

an illuminated display including beveled edges (column 11 lines 33-42). It would have been obvious to one of ordinary skill in the art to utilize such beveled edges as in Shelton on the display of Kingston so as to provide further illumination to the display.

13. Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kingston in view of Green et al. US #3,751,319.

14. Kingston does not teach applying a paste to form the three dimensional body, however such paste is well known in the art as shown by Green et al. Green et al. show a display including a hardening resin which is applied on the surface of the display. It would have been obvious to one of ordinary skill to apply such a layer to the display of Kingston to provide a non-yellowing protective layer, as is taught by Green et al.

Allowable Subject Matter

15. Claims 9 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
